Others thought it would be wise to continue to operate the plant here, in part, at least. Finally this matter was left undecided, and a committee of five leading stockholders was appointed to go to Anderson and inspect the American plant, and ascertain what the authorities of Anderson would be willing to do to of Anderson would be willing to do t ecure the Central's management of the

American works.

The Central company recently had notice of another advance of its natural gas rates, the second in a year. This advance jumps its fuel bill up to \$25,000, whereas at the opening of the past year the charge was but \$19,000. This increase is a decided item to any factory, and a step by which it would get rid of an expenditure of \$25,000 a year would American works. an expenditure of \$25,000 a year wou commend itself to anyone interested in its earnings. The river did quite as well as anybody expected. It got up to a thirty-three and a half foot stage about mid-night Saturday, and after remaining stationary at that height awhile, began to fall slow-ly. Last night it had only gone down a little over three feet, and the fall will probably be slow. Only the cold snap prevented a serious floot. As it was, a little inconvenience resulted.

The weather Saturday and yesterday (ortunataly remained cold, never retting

The weather Saturday and yesterday fortunately remained cold, never getting above the freezing point. This checked the accessions of water and let the river recede, so that it would now take a good deal of thawing weather and rain to make a flood. There remains plenty of snow to cause a disastrous rise were it to go off suddenly.

The water was over low-lying grounds on the Island and on the South Side. At
